AI pricelist 2015

We offer a limited fixed veterinary fee package for artificial insemination (AI). The basic fee includes all scans and hormone injections required to monitor and synchronise a mare for AI. Should the mare suffer from endometritis or other problems these are not covered by the fixed fee and, if required, additional treatments will be charged separately. This fee also excludes livery and other costs related to keep.

We recommend that mares come to our centre at Dykehead for AI. However we will AI mares at owners premises with fresh and chilled semen only provided there is a set of examination stocks, good hygienic facilities and enough competent people on site to help; all frozen AI to be done at Dykehead. You have the option of leaving your mare here for the entire process (which is usually more straightforward), or only bringing your mare here to be inseminated then bringing her back for scans as necessary. As a minimum mares will need to be resident for 2 or three days during the actual insemination process. For resident mares you can choose whether you want the mare stabled, part or full turn out. Mares visiting for the insemination process only will be stabled.

We have facilities to foal mares. Please contact us first if you want to bring a mare here for foaling.

If you want to be certain of your costs and don't want to pay anything if your mare is not pregnant then use our no pregnancy no fee option. This option must be selected and paid for before the mare arrives at stud and is subject to confirmation following a pre breeding assessment on arrival at stud. You can also elect to pay for each scan or other examination or treatment individually. This is likely to be more expensive in most cases.

All mares will need a current valid test certificate for CEM, EVA EIA and Strangles before any fertility treatment at the practice premises. All semen must be from stallions certified EVA and CEM negative. Semen will be rejected without correct documentation. See terms and conditions.

Please note these fees are not valid for embryo transfer. There is a separate embryo transfer pricelist. Insemination fees are included in the embryo transfer packages.

Limited veterinary fee per insemination cycle (see terms and conditions – excludes livery)

£ plus VAT
